Professional Summary

Third-year Information Technology undergraduate at the University of Moratuwa with hands-on experience in full-stack software development and practical web application projects. Experienced in collaborative and individual development, with a strong interest in software engineering, AI/ML, and intelligent systems. A proactive learner committed to solving real-world problems and continuously developing technical expertise.

Education

BSc (Hons) in Information Technology - University of Moratuwa

2024 – 2028

Cumulative GPA: 3.80 | Dean's List - Semester 1

G.C.E. Advanced Level - Sanghamiththa Balika Vidyalaya, Galle

2019 – 2022

Z-Score: 1.7230 | (ICT - A, Combined Mathematics - B, Physics - C)

Technical Skills

- **Programming Languages:** Python, JavaScript, TypeScript, C, PHP, Java
- **Frontend:** React, Next.js, HTML, CSS, Tailwind CSS, Bootstrap
- **Backend:** Node.js, Express.js, Flask, Django, FastAPI
- **Databases:** PostgreSQL, MySQL, MongoDB, MS SQL Server
- **Data Science & ML:** NumPy, Pandas, Scikit-learn, Google Colab, Kaggle
- **Cloud & Deployment:** Docker, AWS, Vercel, Render
- **Tools:** Git, GitHub, Postman, Figma, Canva, Ubuntu

Projects

DocFlow - Document Management System - Client: IXD Labs [Repository](#) 

[Second Year Software Group Project]

Technologies: React, TypeScript, Tailwind CSS, Django, PostgreSQL, Redis, Celery, Gemini, Ollama

- Developed an enterprise document workflow platform for document management, workflow execution, SLA monitoring, performance analytics, and AI-assisted document insights, delivered as a client project for IXD Labs.
- My contribution: Engineered a configurable working-hours system and business-hours-aware SLA engine supporting working days, daily schedules, holidays, SLA due-time calculation, and automated breach monitoring; developed KPI and workflow analytics dashboards; and implemented an AI chatbot with RAG-based document retrieval, natural-language-to-SQL querying, configurable LLM providers, Ollama integration, Gemini model fallback, and natural-language responses.

HelloLobby - Hotel Management System [Ongoing] [Repository](#) 

Technologies: React, Node.js, Express, MongoDB, JWT, REST APIs

- Developing a full-stack hotel management platform that centralizes reservations, room management, guest services, staff operations, payments, reporting, and administrative workflows.
- Implementing role-based authentication and authorization, room and reservation management, availability tracking, front-desk operations, and secure API communication across the system.
- Extending the platform with AI-powered capabilities, including an intelligent hotel assistant, automated insights and reporting, and recommendation features to support guests and hotel staff.

UniThaksalawa - Location-Aware Education Platform [Group Project] [Repository](#) 

Technologies: React, Tailwind CSS, MongoDB, Express.js, Node.js

- Developed a platform that helps students discover nearby educational classes based on their location.
- My contribution: Developed the My Classes and My Enrollments modules, including class creation, backend data fetching, and enrollment displays.

Product Store - MERN E-Commerce Application [Repository](#) 

Technologies: React, Node.js, Express.js, MongoDB

- Developed a full-stack e-commerce application with product-management features.
- Implemented the React frontend and integrated it with backend APIs for product and store operations.

Heritage Information System [Group Project] [Repository](#)

Technologies: *Next.js, React, FastAPI*

- Developed a full-stack heritage information platform for managing and publishing architectural and cultural heritage content.
- My contribution: Implemented login and signup functionality end-to-end, developing the authentication interfaces and integrating them with backend authentication APIs for user registration and login.

Laptop Price Predictor [Repository](#)

Technologies: *Python, Flask, Machine Learning*

- Developed a web application that predicts laptop prices based on hardware specifications.
- Integrated a trained machine-learning model with a web interface to generate predictions from user inputs.

MicroMinds - Arduino-Based CNC Foam Cutting Interface [Group Project] [Repository](#) [Live Demo](#)

Technologies: *React, Tailwind CSS, Arduino, ESP32, Firebase*

- Developed an Arduino-based CNC foam-cutting system with a web interface for designing and managing foam-cutting tasks.
- My contribution: Implemented the Shape Input, Review, History, and Library modules in the web application, and contributed to the hardware integration involving GRBL, ESP32, and the TFT display.

PetConnect - Pet Welfare Platform [Group Project] [Repository](#)

Technologies: *React, Tailwind CSS, MongoDB, Express.js, Node.js*

- Developed a community-focused pet welfare platform for sharing pet-related information and connecting users with lost, injured, adoptable, and sale-listed pets.
- My contribution: Built the Home and News modules, including the hero section, latest-posts and community-engagement layouts, and categorized news sections for Lost Pets, Injured Pets, Pets for Adoption, and Pets for Sale.

SpritiX - Sports Management System [Group Project] [Repository](#)

Technologies: *PHP, MySQL, HTML, CSS, JavaScript*

- Developed an inter-university fantasy cricket platform that enables users to build teams from real university players, track player statistics, manage budgets, and compete through leaderboards.
- My contribution: Developed the admin dashboard, implementing player management CRUD operations, dynamic player-statistic displays, tournament statistics, and the admin profile module.

Experience & Activities

Data Annotator - ThakralOne	2025 – 2026
Technical Content Writer - Medium	2024 – Present
Postman Student Expert	

Achievements & Participation

- Top 10 - OctWave 3.0 AI/ML Initiative, IEEE IAS Student Branch (2026)
- Finalist - InspiHer Hackerina, SLTC Research University (2025)
- Participant - AgentX Bootcamp on AI Agents, University of Moratuwa × Zone24x7 (2025)
- Participant - Codex Hackathon, University of Moratuwa (2025)
- Participant - ReidXtreme 3.0 Hackathon, UCSC (2024)

Leadership & Volunteering

• Director of Design and Publicity - WIE IEEE Affinity Branch, University of Moratuwa	2026 – 2027
• Lead, Video Editing Committee - Enguinity 2.0, WIE IEEE Student Branch	2025 – 2026
• Organizing Committee Member - 9th International Conference on IT Research	2025
• Organizing Committee Member - FIT Future Careers	2025
• Web & Technology Pillar Member - MoraSpirit	2025 – 2026
• Volunteer Teacher & Motivational Speaker - Sasnaka Sansada	2023 – 2025
